

Turn New Hires into Productive Contributors - Faster

Build role-ready technical talent through tailored, hands-on onboarding programs aligned to your technology environment and business priorities.

Make onboarding a workforce advantage

Traditional onboarding transfers information. ROI builds the practical capability new hires need to perform with confidence.

Faster time to productivity

Contribute sooner

Greater role readiness

Perform with confidence

Stronger retention

Support continued growth

From new hire to productive contributor

01 ALIGN

Map roles and capabilities to your tech stack, workflows, AI strategy, and goals

02 BUILD

Create targeted pathways across app development, data, cloud, and AI

03 APPLY

Learn through instruction, hands-on labs, real-world use cases, and capstones

04 MEASURE

Track skills, contributions, readiness, certification, retention, and AI adoption.

AI is embedded throughout, from responsible use to real-world application

The ROI Training advantage

Tailored

Your roles, stack, and priorities

Hands-on

Learning connected directly to real work

Fully managed

Cohorts, support, and reporting

Expert-led

Learning Architects and proven practitioners
